AthenaRMS Remote

Product Overview

InterAct PUBLIC SAFETY SYSTEMS

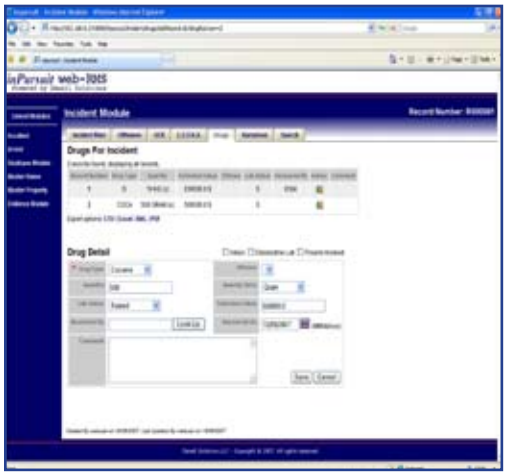
Making Connections for Life.

Access Critical RMS Data From Any Mobile/Remote Location

AthenaRMS Remote enables users to access critical RMS data from any location. All that is needed is a web browser and connectivity. AthenaRMS Remote users may continue to take advantage of the feature-rich, full suite of client/server RMS modules, while having the ability to access critical RMS data remotely, via a web browser.

Features

- Critical data is available anywhere via Internet or Intranet
- Web-based GUI to search for and view records
- In-house users still retain access to the full client/server suite of modules
- Dashboard access to RMS data
- Share information with external agencies to provide query access to names, vehicles, BOLOs, and other critical records data
- Takes advantage of low-bandwidth wireless networks
- Hardware and application server independent



Administration and Security

- Integrate with LDAP technology
- No client installation required, just a simple web browser URL address
- Define security permission groups to establish read/write and read-only privileges
- Enforce user names and encrypted passwords
